

My husband has been an OTR truck driver for over 15 years. XM radio has made his job less stressful for many reasons. The traffic and weather has been the most beneficial to him. The advanced notice on traffic allows him to find a place to park prior to getting to a traffic back up. The less people in the backup, then the faster traffic can resume. The weather has been just as beneficial. Some of the storms through the midwest have been extremely dangerous. Instead of driving into blinding rain, he can once again find a place to park until conditions are safer. Though I personally don't like big trucks, we could not survive without them. They transport EVERYTHING!!!!!! Let us keep XM radio so that our drivers can make the roads a little safer for them and others around them.
